Drug Checking - Trends, results and experience

DONNERSTAG 09.11.2017 14:00-15:30

Abstract Henry Fisher, PhD

I will be discussing the work of The Loop harm reduction organisation, particularly over the last two years where they have introduced Multi Agency Safety Testing to UK festivals and why this approach is particularly important in the current context of rising MDMA and cocaine purity and rising numbers of drug deaths. I will be speaking about the challenges The Loop have experienced in persuading stakeholders of the value of drug testing services, and how we have optimised and improved our testing system this year following our successful pilots last year.
